2. Validation Rule on SportsProgram Object:

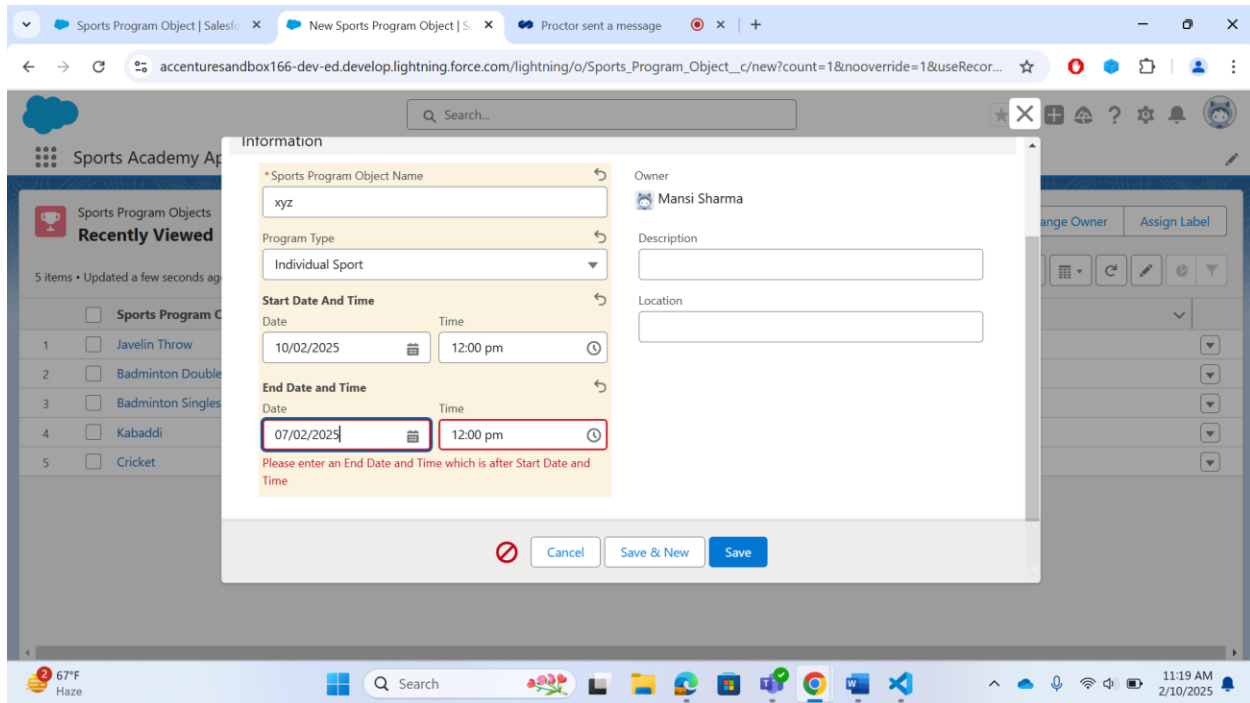

- A validation rule on Sports Program object to ensure that the End Date and Time are after the Start Date and Time.

The screenshot shows the Salesforce Setup interface for configuring a validation rule on the Sports Program Object. The browser address bar indicates the URL: `accenturesandbox166-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/011Qy000003HxJh/ValidationRules/03dQy0000...`. The page title is "Sports Program Object Validation Rule".

Validation Rule Detail

Rule Name	End_Date_Time_after_Start_Date_Time	Active	✓	
Error Condition Formula	End_Date_and_Time__c <= Start_Date_And_Time__c			
Error Message	Please enter an End Date and Time which is after Start Date and Time		Error Location	End Date and Time
Description				
Created By	Mansi.Sharma, 10/02/2025, 10:03 am		Modified By	Mansi.Sharma, 10/02/2025, 10:03 am

The left sidebar contains the following navigation menu items: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, and Related Lookup Filters. The bottom of the screen shows the Windows taskbar with the date and time: 11:19 AM, 2/10/2025.

4. Trigger to update Registration status:

- Implement a Trigger that automatically updates the Registration Status field on the Program-Athlete records when an athlete:
- Registers à it should be updated to confirmed
- Cancels their registration à It should be updated to Withdrawn.

Developer Console - Google Chrome

3. Lightning Web Component(LWC):

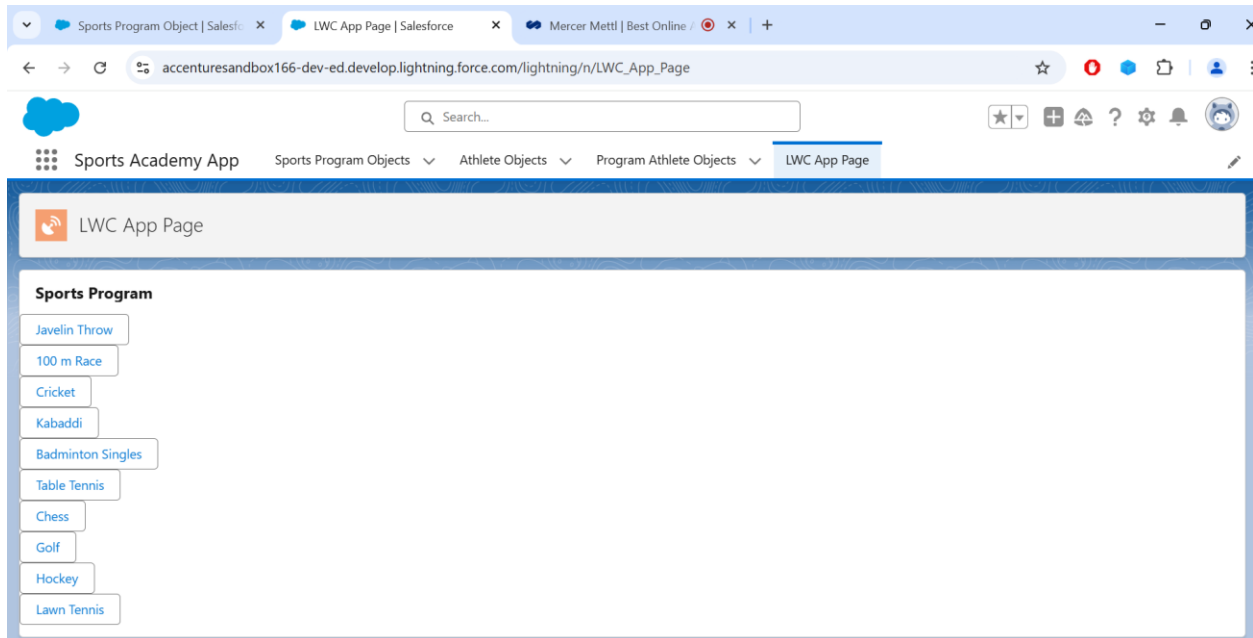

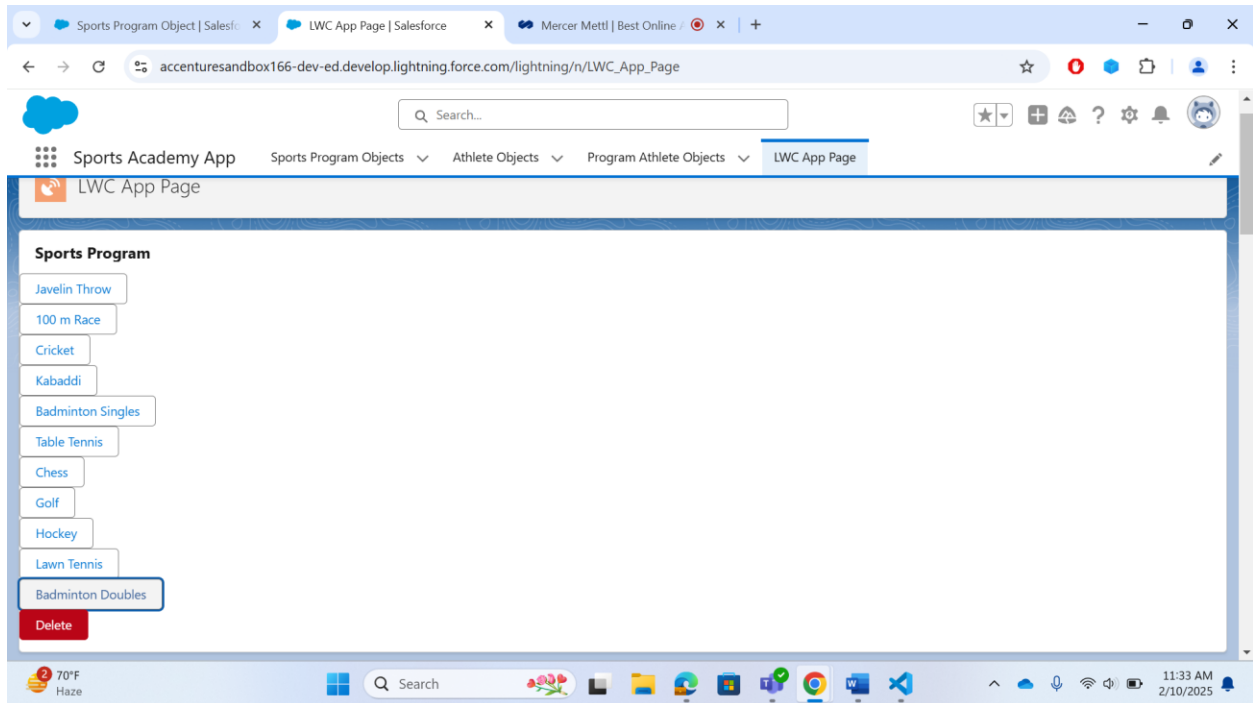

- Create a Lightning Web Component that displays the list of all sports program(s). On selecting a particular sports program, the delete button should appear. And on clicking delete button, the selected sports program should delete and the list should refresh automatically.
- Include this component on the Home Page of the Sports Academy Application.

```
1 <template>
2 <lightning-card title="Sports Program">
3   <template if:true={programs}>
4     <ul>
5       <template for:each={programs} for:item="program">
6         <li key={program.Id}>
7           <lightning-button
8             label={program.Name}
9             data-id={program.Id}
10            onclick={handleSelect}>
11             </lightning-button>
12         </li>
13       </template>
14     </ul>
15   </template>
16
17   <template if:true={selectedProgramId}>
18     <lightning-button
19       label="Delete"
20       variant="destructive"
21       onclick={handleDelete}>
